Preserving Smiles: A Journey into Minimally Invasive Oral Healthcare

Objectives

GAIN A THOROUGH UNDERSTANDING OF MINIMALLY INVASIVE DENTISTRY AND ITS APPLICATION IN VARIOUS CLINICAL SCENARIOS.

EXPLORE THE LATEST ADVANCEMENTS IN MINIMALLY INVASIVE PRODUCTS, INCLUDING SDF, GLASS IONOMER SEALANTS, AND DENTAL PRODUCTS FORMULATED WITH BIOACTIVE MATERIALS THAT PROMOTE ENAMEL REMINERALIZATION AND THEIR ROLE IN PREVENTING AND MANAGING DENTAL CARIES.

LEARN HOW TO INTEGRATE AT-HOME PRODUCTS AND BEHAVIOR MODIFICATION TECHNIQUES, SUCH AS PATIENT-CENTERED CARE AND MOTIVATIONAL INTERVIEWING, INTO DAILY PRACTICE TO IMPROVE PATIENT COMPLIANCE AND TREATMENT OUTCOMES.

ACQUIRE PRACTICAL SKILLS AND KNOWLEDGE THAT CAN BE IMMEDIATELY APPLIED IN THE CLINICAL SETTING TO ENHANCE PATIENT CARE AND SUPPORT THE TRANSITION TO A MINIMALLY INVASIVE APPROACH.

SUMMARY

Minimally invasive dentistry represents the cutting-edge frontier of oral healthcare, and this course will serve as your gateway to its myriad possibilities. Michelle will guide you through a broad scope of topics, ensuring you are well-equipped to deliver the highest level of patient-centered care.

Throughout this immersive learning experience, our participants will acquire a rich understanding of innovative techniques and strategies that elevate the standard of care and champion the preservation of valuable tooth structures.
